ROYCE®

Axine Tablet 8mg

(Bromhexine HCl-Mucolytic)

Presentation:
Round, yellow tablets with a breaking line on one side. Diameter 7.1 mm.

Content:
Each tablet contains:
Bromhexine Hydrochloride 8mg

Pharmacological Information:
Bromhexine Hydrochloride has been reported to change the structure of bronchial secretions and to increase the volume and reduce the viscosity of sputum.

It is well absorbed after oral administration. The peak plasma concentration is reached within about an hour. It is also rapidly distributed. It acts through the sulphate and glucoronic acid conjugation.

After an oral dose, about 70% is excreted within 24 hours and in 5 days, about 90% is excreted in the urine and 4% in the faeces. After an intravenous dose, about 50% is excreted in urine in 24 hours and in 5 days, about 80% is excreted in the urine and 5% in faeces.

For further information on absorption, distribution and excretion refer to R. Jauch and R.Hankwitz Arzeneimittel Forsch.

Indication:
Reduction of sputum viscosity.

Dosage and Administration:
Adults: 8 to 16 mg three times daily.

Contraindication:
In patients hypersensitive to Bromhexine Hydrochloride.

Warning and Precautions:
Should be administered with caution to patients with gastric ulceration.

Interaction With Other Medicaments:
Bromhexine has been shown to increase oxytetracycline concentration in sputum and in nasal mucus.

Pregnancy and Lactation:
No report has been reported.

Side Effects:
Gastro-intestinal side effects may occur occasionally and a transient rise in serum aminotransferase values has been reported.

Symptoms and Treatment of Overdose:
See Side Effects.

Storage Condition:
Store in a dry place (below 30°C). Keep container tightly closed. Protect from light.

Pack Size:
Plastic bottle of 100 tablets.

Product Registration Number:
MAL19910345XZ
