

Good Practices for ampoule breakage

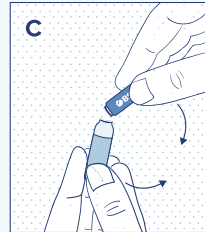

(Fig: Parts of an ampoule)

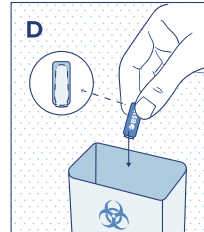

A
Keep the ampoule vertically straight and tap on the protective sleeve covering the neck slightly as to allow all content (liquid) into the bottom of ampoule.

B
Hold the ampoule bottom with one hand firmly. Hold the protective sleeve covering the neck between your thumb and first finger of second hand.

C
Bend the Ampoule slightly and apply the force on the protective sleeve covering the neck away from body gently to break the ampoule.

D
Discard the protective sleeve with the top half of the ampoule.
