## What K-WORM Choc Chewtab is used for

K-WORM Choc Chewtab is used for the treatment of single or mixed infestations of intestinal parasites.

## How K-WORM Choc Chewtab works

K-WORM Choc Chewtab contains Albendazole exhibits vermicial, ovacidal and larvacidal activities. It inhibits tubulin polymerization in anthelmint and thus depletes their energy level until they become inadequate for survival.

## Before you use K-WORM Choc Chewtab

### - When you must not take it

Do not take this product if you are allergic (hypersensitivity) to Albendazole, other benzimidazole derivatives or any other ingredients in this product.

### - Before you start to use it

Should not be administered during confirmed or suspected pregnancy. Use with caution during lactation as extent of excretion from breast milk is not known

### - Taking other medicines

Plasma concentration of the active metabolite of Albendazole is raised when administered concomitantly with Dexamethasone, Praziquantel and Cimetidine.

## How to take K-WORM Choc Chewtab

### - How much to take

For pinworm, whipworm, roundworm and hookworm infestation:

Adults & children above 2 years: Chew 2 tablets as a single dose.

Children 1 to 2 years: Chew 1 tablet as a single dose.

For tapeworm and threadworm infestation: Adults & children above 2 years: Chew 2 tablets once daily for 3 consecutive days.

### - When to take it

Can be taken before or after food.

### - How long to take it

Take as directed by your doctor or pharmacist.

### - If you forget to take it

If you forget to take K-WORM Choc Chewtab, take it as soon as you remember. Never double up on the next dose to make up for the one missed.

### - If you take too much (overdose)

Symptoms such as nausea, vomiting, diarrhoea and abdominal pain. In case of overdose, call your doctor or go to the accident and emergency centre at your nearest hospital immediately.

## While you are using K-WORM Choc Chewtab

### - Things you must do

Check with your doctor if symptoms persist or getting worse.

### - Things you must not do

Do not take this product to treat any other conditions unless it has been prescribed by your doctor.

### - Things to be careful of

Do not take any new medicines without consulting your doctor.

## Side Effects

Albendazole is generally well tolerated. Symptoms reported include gastrointestinal symptoms and headache.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by calling Tel: 03-78835549, or visiting the website [npra.gov.my](http://npra.gov.my) (Consumers → Reporting Side Effects to Medicines (ConSERF or Vaccines (AEFI))).
