## What K-WORM Choc Suspension

### 400mg/10ml is used for

K-WORM Choc Suspension 400mg/10ml for the treatment of single or mixed infestations of intestinal parasites.

## How K-WORM Choc Suspension

### 400mg/10ml works

K-WORM Choc Suspension 400mg/10ml contains Albendazole exhibits vermucidal, ovacidal and larvacidal activities. It inhibits tubulin polymerization in anthelmint and thus depletes their energy level until they become inadequate for survival.

## Before you use K-WORM Choc

### Suspension 400mg/10ml

#### - When you must not take it

Do not take this product if you are allergic (hypersensitivity) to Albendazole, other benzimidazole derivatives or any other ingredients in this product.

#### - Before you start to use it

Should not be administered during confirmed or suspected pregnancy. Use with caution during lactation as extent of excretion from breast milk is not known.

#### - Taking other medicines

Plasma concentration of the active metabolite of Albendazole is raised when administered concomitantly with Dexamethasone, Praziquantel and Cimetidine.
