

PROSPAN®

Cough Syrup

Active ingredient:

Hedera Helix Extract

(Dried Ivy Leaf Extract)

Information for use.

Please read carefully!

- **No Added Alcohol • No Added Sugar**
- **No Added Colouring**

Product description:

Prosperan® Cough Syrup is a light brown, slightly cloudy syrup which tastes sweet and fruity and smells of cherry.

Composition:

Active ingredient: 100 ml solution contains 0.7 g of heder helix extract from leaf (5–7.5 : 1), 0.134 g of potassium sorbate (preservative).

Other ingredients: anhydrous citric acid, xanthan gum, aroma, sorbitol solution 70 %. 2.5 ml of solution contains 0.963 g of the sugar substitute sorbitol = 0.08 BU.

Indications:

Traditionally used for relief of cough, throat irritation and reducing phlegm.

Contraindications:

In the event of fructose intolerance, treatment should be carried out only after consultation with a doctor.

Pregnancy and breast-feeding:

Insufficient reliable data. This medicine should not be used, as there have not been enough studies performed on pregnant women and mothers who breastfeed.

This is a traditional medicine. Please consult your pharmacist/doctor if symptoms persist/worsen.

Side effects:

In rare cases, Prosperan® Cough Syrup may have a laxative effect due to the content of sorbitol in the product.

Interactions with other drugs:

Adverse effects have not become known with

the simultaneous ingestion of Prosperan® Cough Syrup and other medicines. This preparation can therefore be combined safely with other medicines, such as antibiotics for example.

Dosage guidelines and method of use:

Children (1-5 years): Please consult a doctor/pharmacist before taking this product. Take 2.5 ml 3 times daily. Schoolchildren (6-9 years) and adolescents (>10 years) take 5 ml 3 times daily, and adults take 5-7.5 ml of solution 3 times daily. Use enclosed measuring cup. Can be taken with or without food.

Shake the bottle well each time before use!

Duration of use:

Duration of treatment depends on the type and severity of the clinical picture; however, treatment should last for at least one week. Treatment with Prosperan® Cough Syrup should be maintained for 2 – 3 days after symptoms have subsided, in order to ensure lasting success of therapy. In the event of persistent complaints or the appearance of shortness of breath, fever as well as purulent or bloody expectoration, a doctor should be consulted immediately.

Storage instructions and shelf life:

Store below 30° C. Protect from light and moisture. Prosperan® Cough Syrup should not be used after the expiry date.

Keep out of reach of children. Jauhkan daripada capaian kanak-kanak.

Special note!

Prosperan® Cough Syrup contains a plant extract as the active ingredient and its colour can therefore occasionally vary, like all preparations made from natural ingredients. This, however, does not affect the therapeutic effectiveness of the preparation.

Product Registration Holder:

Delfi Marketing Sdn. Bhd., Level 6, Block A, Sky Park One City, Jalan USJ 25/1, 47650 Subang Jaya, Selangor, Malaysia.

Cough Syrup

Active ingredient:

Hedera Helix Extract

(Dried Ivy Leaf Extract)

Dear patient,

Prospan® Cough Syrup is a natural product and contains an active ingredient, which is purely herbal. With the following information, we wish to explain to you how this preparation helps to combat your respiratory tract illness – effectively and gently.

Air – is life.

The respiratory organs provide our body with vital oxygen, which has to be taken from the air and passed into the blood circulation. In order to do this, the air we breathe is conducted into a vast finely branched system of tubes – the bronchi, and from there it passes into approximately 500 million alveoli, which have a total surface area of almost 100 m². These air cells ensure that the blood can absorb the oxygen from the air and that it thus reaches all parts of the body.

Breathing – a “clean” affair.

For an optimal exchange of oxygen, it is most important that the function of the bronchi is not hindered by foreign matter, such as dust particles, for example. For this reason, our air passages have an excellent natural cleaning mechanism: they are lined with a mucous membrane and a number of cilia or tiny hairs, which have the function of automatically transporting any foreign matter which is breathed in back out. Numerous mucous glands help the cilia in their function by continually moistening the whole respiratory tract system.

Ivy – is nature.

For hundreds of years, many people have trusted in the healing power of wild-growing medicinal ivy for the treatment of illnesses of the respiratory tract. The handed down knowledge has been used by Engelhard Arzneimittel and further developed during years of intensive research. The result is the original of an ivy extract, which

is manufactured using a special procedure and which is contained in all Prospan® preparations. The pure force of medicinal ivy is thus able to be used optimally and in a modern way with Prospan®.

Prospan® – cough’s solution.

Prospan® relaxes and calms coughing. In this way, Prospan® combats the typical complaints of increased formation of viscous mucus, shortness of breath and irritation of the throat. Troublesome and painful coughing is calmed, but not blocked, which is important for being able to cough up the mucus and thereby allow for trouble-free deep breathing.

Prospan® – for the whole family.

Prospan® Cough Syrup is free from alcohol, sugar and colourings and has a pleasant taste of cherry. Therefore, it is particularly suitable for children and adults for fighting against the complaints of illnesses.

Pack size:

Bottles of 100 ml and 200 ml syrup.

Manufacturer:

Engelhard Arzneimittel GmbH & Co. KG
Herzbergstraße 3, 61138 Niederdorfelden,
