What Alsoft A is used for

Alcohol-based hand disinfectant for hand hygiene and surgical disinfection

How Alsoft A works

Active against a wide spectrum of microorganisms including rapid action against MRSA bacteria. Chlorhexidine Gluconate provides antibacterial efficacy for hours after application.

Suppresses the causes of skin roughness with emollients without inhibiting disinfection.

Antibacterial, antifungal, and virucidal against an array of microorganisms

Before you use Alsoft A

To be used in full strength, do not dilute. Wash the hand before use Alsoft A if you have organic substances such as serum, pus and the like attenuate bactericidal activity.

How to use Alsoft A

Hygienic and surgical hand disinfection

*For hygienic hand disinfection rub the solution into the skin and keep the skin well moistened for 30 seconds

*For surgical hand disinfection rub the solution into hands and lower arms and keep the skin well moistened for 3 minutes

While you are using it

Be careful as it may cause skin roughening due to degreasing etc. when used repeatedly. Seek for doctor if chemical burns have occurred when contacting with the product solution with skin for a long time.

Side effects
