FEIBA 100 U/ml 2500 U

Powder and solvent for solution for infusion
Factor VIII Inhibitor Bypassing Activity

1 vial contains 1000 – 3000 mg human plasma protein with 2500 Units of Factor VIII Inhibitor Bypassing Activity.
1 unit of FEIBA shortens the aPTT of a factor VIII inhibitor plasma by 50% of the buffer value.

Excipients:
Powder: Sodium chloride, sodium citrate
Solvent: Water for Injections

Do not store above 25°C. **Do not freeze**. Store in the original package in order to protect from light.

Read package leaflet before use. Intravenous use. For single use only. I.V. infusion (max. 10 U/kg body weight per minute). Use the reconstituted solution immediately (within 3 hours). Reconstituted product must not be refrigerated. Any unused product should be disposed of in accordance with local requirements. Keep out of the sight and reach of children.
