What Lion Ball Combitem Cream 1%w/w is used for

Lion Ball Combitem Cream 1%w/w is used for treatment of skin fungal infections include ringworm, athlete's foot, jock itch and white spot.

How it works

It contains Clotrimazole which is an antifungal agent that works by preventing the growth of fungus.

Before you use it

This product is contraindicated in patients with known sensitivity to the Clotrimazole.

No known interactions with other medicaments.

How to use it

Washed and dried the affected area, apply twice daily. Treatment should continue for 2-4 weeks after symptoms disappear.

Acute overdosage with topical application of Clotrimazole is unlikely.

While you are using it

You are advised to use the medication for the full treatment time even though the symptoms may have improved.

If you are pregnant or breastfeeding, you should not use this product unless advised by your doctor.

For external use only

Side effects

Skin irritation, burning sensation, contact dermatitis, blister, edema, and erythema, peeling of skin, pruritus, urticarial and stinging of skin

If severe irritation occurs, discontinue use immediately and consult a physician.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by calling Tel: 03-78835550, or visiting the website portal.bpfk.gov.my (Consumers → Reporting).

Storage and Disposal

Store below 30°C.
Protect from light and moisture.
Keep out of reach of children

Dispose empty container after finish use
