What Ultracarbon N.F. Tablet is used for

Diarrhoea particularly when travelling in countries with increased hygiene risks (change of food, travel and summer diarrhoea), development of gases or air in the intestine, or flatulence.

How Ultracarbon N.F. Tablet works

Ultracarbon N.F. tablets contain high- quality activated charcoal which is produced by carbonization of vegetable materials. It is highly adsorbent due to its large surface. Ultracarbon N.F. tablets are used in case of diarrhoea, especially when travelling in countries with high hygienic risk.

Medicinal charcoal is evacuated in a natural way together with the adsorbed toxic agents.

Before you use Ultracarbon N.F. Tablet

When you must not use it

- If you are hypersensitive (allergic) to medicinal charcoal or any of the other ingredients of Ultracarbon N.F. tablets.

- In case of heavy constipation and suspected intestinal obstruction.

Before you start use it

Pregnancy and lactation – Ultracarbon N.F. tablets may be taken during pregnancy and breast-feeding.

Taking other medicines

Due to its highly adsorbent qualities, medicinal charcoal may reduce the effect of other pharmaceutical products.

Ultracarbon N.F. should not be used together with drugs which induce vomiting, neither should the tablets be taken together with Preparations which contain tannins.

In case of the oral anti-diabetic drug chlorpropamide as well as heart active glycosides, resorption from the bowel is inhibited in the order of up to 90%. Therefore, it is recommended to take these drugs 2 hours before taking Ultracarbon N.F. tablets or with a time lag of several hours.

The use of medicinal charcoal may reduce the reliability of oral contraceptives/ovulation inhibitors so that it might be necessary to use an additional form of contraception after taking medicinal charcoal. Any other kind of medicine should be taken at least 1 hour before tablets are taken

Please tell your doctor or pharmacist if you are taking or have recently taken any other medicines, including medicines obtained without a prescription

How to use Ultracarbon N.F. Tablet

How much to use

In cases of diarrhoea, gases in the intestine and flatulence, adults and children above 6 years of age:

Take 3-4 tablets 3 times a day with ample amount of liquid, chewed or not chewed.

When to use it

The tablets can be taken chewed or swallowed with some liquid.

How long to use it

Ultracarbon N.F. should be used until action of the bowel is normal again.

You must talk to a doctor if you do not feel better after 3 days. There is no cause for concern when stopping or discontinuing treatment.

If you have any further questions on the use of this medicinal product, ask your doctor or pharmacist.

If you forget to use it

Do not take a double dose to make up a forgotten dose.

If you use too much (overdose)

Constipation might occur. This can be prevented by using laxatives.

ULTRACARBON N.F. TABLET

Activated Charcoal 250mg

While you are using it

Things you must do

Take your medicine exactly as your doctor has told you.

Tell all the doctors and pharmacists that are treating you that you are taking Ultracarbon N.F. Tablet.

Tell your doctor immediately if you become pregnant while taking this medication

Things you must not do

Do not stop taking the medicine unless advised by your doctor.

Do not take any new medicines without consulting your doctor.

Do not give Ultracarbon N.F. Tablet to anyone else even if they have the same symptoms or condition as you.

Things to be careful of

After using Ultracarbon N.F. tablets, your stool may be black coloured, a harmless phenomenon. Stool should be observed for several days after having stopped taking Ultracarbon N.F. If dark colouring of the stool persists, you should consult a doctor to exclude the possibility of gastrointestinal bleeding.

If poisoning is suspected or if pain increases in the area of the doctor should be consulted immediately.

Ultracarbon N.F tablets have no influence on the ability to drive and use machines.

Side Effects

Like all medicines, Ultracarbon N.F. Tablet can cause side effects, although not everybody gets them. If any of the side effects gets serious, or if you notice any side effects not listed in this leaflet,

please tell your doctor or pharmacist.

Gastrointestinal diseases: In rare cases gastrointestinal troubles, such as constipation and vomiting, are observed.

As activated charcoal is excreted unchanged, stool is Black-coloured after taking Ultracarbon N.F. tablets.

Visit your doctor or pharmacist immediately if you experience any side effects after using this medicine.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npra.gov.my [Consumers à Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)].

Storage and Disposal of Ultracarbon N.F. Tablet

Storage

Stored below 30°C. Keep away from direct sunlight.

Store in the original package to protect the contents against light and humidity.

Keep out of the reach and sight of children.

Do not use the medicinal product after the expiry date "EXP" which is stated on the outer carton. The expiry date refers to the last day of that month.

Disposal

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.

Product Description
