- if you are pregnant, planning to become pregnant, or are breastfeeding
 - if you are taking prescription or non-prescription medicine, herbal preparation, or dietary supplement,
 - if you have had an allergic reaction to aspirin or other salicylates
 - if you have a wound at the affected area or your skin is broken or damaged in any way

What NW Methyl Salicylate 50%w/w Ointment is used for?

NW Methyl Salicylate 50%w/w Ointment use to treat minor aches and pains of the muscles or joints (e.g: arthritis, backache, sprains)

How NW Methyl Salicylate 50% w/w Ointment works?

Methyl salicylate is known as counterirritant. It works by causing the skin to feel cool and then warm. These feelings on the skin distract you from feeling the aches or pains deeper in your muscles, joints, and tendons

Before you use NW Methyl Salicylate 50%w/w Ointment

When you must not use it

If you are allergic to methyl salicylate or any of the other ingredients of this medicine.

Before you start to use it

- For external used only
- Consult with your doctor or pharmacist if you have any medical conditions, especially if any of the following apply to you:

Taking other medicines

For patients taking warfarin, excessive application on the skin for muscle or joint pains may increase chances of bleeding. If you use too much of this ointment, consult your doctor or pharmacist. Bring any remaining ointment with you.

It is not known to affect other medicine. However, if user is applying other medicated cream, ointments or lotions, user should leave a few minutes between applying NW Methyl Salicylate 50% w/w Ointment and other medicated skin products, unless otherwise directed by doctor.

How to use NW Methyl Salicylate 50%w/w Ointment?
