XELCOL

1 MIU of Colistimethate Sodium Powder for Solution For
injection or infusion or inhalation

**1
Million
IU/vial**

Composition: Each vial contains 1 Million IU which is approximately equivalent to 80mg of colistimethate sodium.

For injection or infusion or inhalation.

Direction of reconstitution:

Instruction for use: It is recommended that colistimethate sodium should be administered under the supervision of physicians with appropriate experience in its use.

Parenteral Administration: The normal adult dose of 2million units should be dissolved in 10-50ml of 0.9% sodium chloride intravenous infusion or water for injections to form a clear solution. The solution is for single use only and any remaining solutions should be discarded.

Bolus injection: Reconstitute each vial necessary for the required dose with not more than 10mL water for injection or 0.9% sodium chloride solution.

After reconstitution: Solution should be used immediately.

Reconstituted vials stored at 2°C to 8°C and used within 24 hours of storage.

The solution is for single use only and any remaining solution should be discarded. Store below 30°C and protect from sunlight.
