10 vials/10 ml

**XELCOL**  
1 MIU of Colistimethate Sodium Powder for  
Solution For injection or infusion or inhalation

10 vials

Composition:  
Each vial contains 1 Million IU which is approximately equivalent to 81 mg of colistimethate sodium.

For injection or infusion or inhalation.  
Direction of reconstitution:  
Suspend under the supervision of physicians with appropriate competence in its use.  
Parenteral Administration: The normal adult dose of Xelcol (1000 IU) should be injected in 10-50 ml of 0.9% sodium chloride intravenous infusion or water for injections to form a clear solution. The solution is for single use only and any remaining solution should be discarded.  
Bottle reconstitution: Reconstitute each vial necessary for the required dose with not more than 10 ml water for injection or 0.9% sodium chloride solution. Reconstituted vials should be stored at 2°C to 8°C and used within 24 hours of storage. The solution is to single use only and any remaining solution should be discarded.
