What OXY LOTION is used for

OXY LOTION helps to kill bacteria which cause acne, dry up excessive oil and unclog blocked pores.

How OXY LOTION works

Benzoyl peroxide has been proven to have bactericidal (capable of killing bacteria) activity; in particular it is active against *Propionibacterium Acnes*. The antimicrobial action decreases the production of irritant fatty acids in the infected follicles.

Benzoyl peroxide also promotes the softening and peeling of skin (keratolytic).

Before you use OXY LOTION

- When you must not use it

Do not use if you have known sensitivity to benzoyl peroxide or especially sensitive skin.

- Before you start to use it

- To test for sensitivity, apply to a small affected area once a day for two days.
- Follow label instructions and continue use if no discomfort occurs.

- Taking other medicines

Tell your doctor if you are taking any other medicines, including any that you buy without a prescription from a pharmacy, supermarket or health food shop.

How to use OXY LOTION

- How much to use

Wash skin thoroughly and dry well. Shake well before using. Dab on OXY LOTION, smoothing it into oily acne/pimple areas of face and neck.

- When to use it

Apply once a day initially, then twice a day, or as directed by your doctor or pharmacist.

- How long to use it

Continue using OXY LOTION as long as your pharmacist or doctor recommends.

- If you forget to use it

Consult your pharmacist or doctor on what you should do if you forget to use it.

If you miss a day, just use the next day on each of the affected areas of your face and neck. Then continue to use at your usual time.

- If you use too much (overdose)

In case of accidental ingestion, contact your doctor immediately or go to the Emergency Department of your nearest hospital.

While you are using it

- Things you must do

Keep away from eyes, lips and mouth.

- Things you must not do

Do not use OXY LOTION after the expiry date.

- Things to be careful of

- For external use only.
- This product may bleach hair or dyed fabrics

Side effects

This product may cause irritation, characterized by redness, burning, itching, peeling, or possible swelling.

Discontinue if irritation is severe and, if it persists, consult a doctor.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by calling Tel: 03-78835490, or visiting the website npra.gov.my [Consumers→ Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)]

Storage and Disposal of OXY LOTION

- Storage

Keep out of the reach and sight of children.

Keep tightly closed. Store in cool place below 30°C.

- Disposal

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
