What M-zole Suspension is used for

M-zole Chewable Tablet is a single dose treatment against single or mixed intestinal worm infections.

How M-zole Suspension works

M-zole Chewable Tablet contains mebendazole which works by stopping the worms from using glucose sugar and leading to the death of the worms.

Before you use M-zole Suspension

- When you must not use it

Do not take this product if you are allergic to mebendazole, similar medicines or any other ingredients in the product.

- Before you start to use it

Consult your doctor before use if you are having liver impairment.
Not to be given to children under 2 years old unless recommended by a doctor.

Not recommended during pregnancy or whilst breastfeeding.

- Taking other medicines

Tell your doctor if you are taking medicines such as:

- carbamazepine, phenytoin (medicines used for seizure)
- cimetidine (medicines used for heartburn and stomach ulcer)

How to use M-zole Suspension

- How much to use

Adults and children above 2 years:

Take 10ml as a single dose.

Take with a full glass of water.

Shake well before use.

- When to use it

Take as a single dose or directed by your doctor or pharmacist.

- How long to use it

A second dose can be taken after 2 to 3 weeks if reinfestation occurs.

- If you forget to use it

If you forget to take M-zole Suspension, take it as soon as you remember. Do not take a double dose to make up for the missed dose.

- If you use too much (overdose)

If you or anyone else may have taken too much of this medicine, contact your doctor immediately or go to the Emergency Department of your nearest hospital. Do this even if there are no sign of discomfort or poisoning. You may need urgent medical attention. Stomach and bowel disturbances may occur in mebendazole overdose.

While you are using it

- Things you must do

Take your medicine exactly as your doctor has told you.

Tell your doctor immediately if you become pregnant while taking this medication.

If symptoms persist, please consult a doctor.

- Things you must not do

Do not take any new medicines without consulting your doctor.

- Things to be careful of

All family members in close contact should be treated at the same time to prevent reinfestation.

Side Effects

Side effects including stomach and bowel disturbances, diarrhoea, headache and dizziness may occasionally occur.

Visit your doctor or pharmacist immediately if you experience any side effects after using M-zole Suspension.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring visiting the website nptra.gov.my [Consumers → Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)]

Storage and Disposal of M-zole Suspension

- Storage

- Store below 30°C.
- Protect from light, heat and moisture.
- Keep out of reach of children.
- Keep cap of bottle tightly closed.

- Disposal

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
