This leaflet answers some common questions about A-BITE CREAM. It does not contain all the available information. It does not take the place of talking to your pharmacist or doctor.

All medicines have risks and benefits. Your pharmacist or doctor has weighed the risks of you applying A-BITE CREAM against the benefits they expect it will have for you.

If you have any concerns about using this medicine, ask your pharmacist or doctor.

Keep this leaflet with the medicine.

You may need to read it again.

What A-BITE CREAM is used for

A-BITE CREAM is used to relieve the symptoms of itchiness from mosquito bites and other insect bites.

How A-BITE CREAM works

A-BITE CREAM contains the active ingredient crotamiton. It also contains Spent Grain Wax (and) Butyrospermum Parkii (Shea Butter) Extract (and) Argania Spinosa Kernel Oil.

Crotamiton helps relieving the itching, it prevents damage to the skin caused by scratching and thus minimizes the risks of secondary infection.

Before you use A-BITE CREAM

-When you must not use it

Do not apply A-BITE CREAM if:

- You are allergic (hypersensitive) to crotamiton or any components in this preparation.

-Before you start to use it

Pregnancy and breast feeding:

- Safe use during pregnancy and lactation has not been established.
- Ask your doctor or pharmacist for advice before taking this medicine if you are pregnant or breast-feeding.

-Taking other medicines

Tell your pharmacist or doctor if you are taking any other products (such as over the counter product, prescribed medicine and herbal products).

How to use A-BITE CREAM

-How much to use

Adult and children above 3 years old:

Apply to the affected area 2-3 times a day. A-BITE CREAM will provide relief from skin itchiness for 6 to10 hours after each application.

Children below 3 years old:

1 application a day to the affected area.

-When to use it

Apply A-BITE CREAM as directed by doctor or pharmacist.

-How long to use it

If condition worsens or does not improve after regular use of this product as directed, consult a doctor.

-If you forget to use it

Apply the cream as soon as possible and then continue the rest of your treatment as usual.

-If you use too much (overdose)

If, by mistake on a few occasions you use more than you should, do not worry. If you apply a lot or a lot is accidentally swallowed, it could make you ill. Talk to your doctor or go to the hospital as soon as possible.

While you are using A-BITE CREAM

-Things you must do

If you are about to start taking on any other new medicine, tell your pharmacist or doctor that you are using A-BITE CREAM.

-Things you must not do

A-Bite Cream should not be applied in the eyes or mouth because it may cause irritation. It should not be applied to acute inflamed skin or raw weeping surfaces until the acute inflammation has subsided.

-Things to be careful of

If irritation or sensitivity occurs, treatment should be discontinued and consult doctor.

Side effects

Like all medicines, A-BITE CREAM can cause side effects, although not everybody gets them. As with all medicines, some people may be allergic to the cream.

Sensitivity to Crotamiton is rare but the medicine may produce irritation in the presence of skin inflammation.

If any side effect becomes severe, or you notice any side effect not listed here, please tell your doctor or pharmacist.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npra.gov.my [Consumers → Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)].

Storage and Disposal of A-BITE CREAM

-Storage

Store below 30°C.

-Disposal

Dispose the medicine after the expiry date.
Consult your pharmacist on how to safely dispose of any medicines no longer required.
