What Edmark Med Rub Balm is used for

It is used for muscular pain and aches.

How Edmark Med Rub Balm works

Methyl salicylate, menthol and camphor are external analgesics which stimulate sensation of warmth and/ or cold. This produces a counter irritant response which provides temporary relief of minor aches and pains of muscles and joints associated with backache, arthritis, strains and sprains.

Before you use Edmark Med Rub Balm

- When you must not use it

Do not use it if you are allergic to any ingredients of Edmark Med Rub Balm.

- Before you start to use it

Initially apply a small amount to a limited skin area and observe whether there is discomfort or itch before applying to a larger skin area. Discontinue use if irritation develops.

Please follow the advice of the doctor or pharmacist.

- Taking other medicines

Please inform the doctor or pharmacist if taking other medicines.

For patients taking warfarin, excessive application on to the skin for muscle or joint pains may increase the chances of bleeding.

How to use Edmark Med Rub Balm

- How much to use

Rub on affected area 2 to 3 times a day.

For external use only. Not to be taken.

Follow all directions given to you by your doctor and pharmacist carefully. They may differ from the information contained in this leaflet. If you do not understand the instructions on the label, ask your doctor or pharmacist for help.

- When to use it

Please follow the advice of the doctor or pharmacist.

- How long to use it

Please follow the advice of the doctor or pharmacist.

- If you forget to use it

Continue to use it as directed by your doctor or on the package label.

- If you use too much (overdose)

Mild chronic salicylate intoxication or salicylism usually occurs only after repeated use of large doses. Salicylism can also occur following excessive topical application of salicylates. Symptoms include dizziness, tinnitus, deafness, sweating, nausea and vomiting, headache and confusion and may be controlled by reducing the dosage.

While you are using Edmark Med Rub Balm

- Things you must do

Inform your doctor or pharmacist of all the medications you are taking.

- Things you must not do

Do not take any new medicines without consulting your doctor.

- Things to be careful of

This product is contraindicated in infants below 2 years of age. Caution must be exercised when older children are treated. It is dangerous to place any camphor containing product into the nostril of children. A small amount applied this way may cause immediate collapse.

Avoid contact with the eyes and mucous membrane. Do not apply to open wounds or damaged skin. Avoid excessive use during pregnancy and lactation. Do not apply over large areas of the body or bandage or use with heating pads.

This product contains methyl salicylate and when applied or rub on to the skin, can be absorbed through the skin into the blood. For patients taking warfarin, excessive application on to the skin for muscle or joint pains may increase the chances of bleeding.

Ask your healthcare provider any question you may have about how to use Edmark Med Rub Balm.

Side effects

Skin irritation, redness or swelling, burning or stinging sensation. Adverse reaction is rare, symptom of dizziness, nausea may occur.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npra.gov.my [Consumers -> Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)].

Storage and Disposal of Edmark Med Rub Balm

- Storage

Store below 30°C. Protect from direct sunlight. Keep out of reach of children.

- Disposal

Medicines should not be disposed of via wastewater or household waste.

Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
