What Axe Brand Medicated Oil is used for

Provides temporary relief of headaches, colds and blocked noses, muscular and joint pains, stomach discomforts and wind, giddiness/ travel sickness and soothes itching from insect bites.

How Axe Brand Medicated Oil works

Menthol relieves itching, dilates the blood vessels causing a sensation of coldness followed by an analgesic (pain-relieving) effect. Camphor also dilates blood vessels and provides pain relief. It causes the skin to feel cool and then warm. These feelings on the skin distract you from feeling the aches/ pains deeper in your muscles, joints, and tendons. Methyl Salicylate has the actions of the salicylates. When the vapour is inhaled, Eucalyptus Oil acts to ventilate the lung (bronchial) passages and relieve bronchitis and associated conditions.

Before you use Axe Brand Medicated Oil

When you must not use it

- Known hypersensitivity/ allergy to any of the

ingredients, aspirin, other salicylates, or other non-steroidal anti-inflammatory drugs

- Do not use in infants under 2 years old. Caution must be exercised when older children are treated

Before you start to use it

Please consult your doctor or pharmacist before using if you are:

- Pregnant or breastfeeding

Do not place any camphor-containing product into the nostrils of children. Even a small amount applied this way may cause immediate collapse.

Taking other medicines

For patients taking warfarin (a medicine to prevent blood clots), excessive application onto the skin for muscle or joint pains may increase the chances of bleeding.

How to use Axe Brand Medicated Oil

How much to use

Apply a few drops to the affected area and massage gently. For external use only.

When to use it

It can be used any time of the day when relief of symptoms is required. The recommended daily dosage is 3-4 times.

How long to use it

Use as long as needed to relieve symptoms.

If you forget to use it

Use it when you remember.

If you use too much (overdose)

Overdose of a topically applied medication is unlikely. If you think you or anyone you know has used too much of this

product, please contact your doctor or pharmacist for advice.

While you are using it

Things you must do

Use this product for external use only.

Things you must not do

- Do not allow this product to come into contact with your eyes and mouth
- Do not use on damaged skin or open wounds

Things to be careful of

- Stop use and consult your doctor if:
 - Your condition worsens, persists for more than 7 days or recurs within a few days
 - You develop excessive irritation or rashes of the skin

Side effects

Local irritations or allergic reactions (rashes and redness) are usually mild and occur rarely. Please consult your doctor/ pharmacist for further information.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npra.gov.my [Consumers→Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)]

Storage and Disposal of Axe Brand Medicated Oil

Storage

Store below 30°C.

Keep all medicines out of the reach of children.
