

Neurobion®

Vitamins B₁, B₆ and B₁₂ in high dosage

MERCK

Neurobion is a combination of three essential neurotropic vitamins belonging to the B group.

Composition

Each coated tablet contains:

Vitamin B ₁ (Thiamine disulphide)	100 mg
Vitamin B ₆ (Pyridoxine hydrochloride)	200 mg
Vitamin B ₁₂ (Cyanocobalamin)	200 mcg

Indications

Neurobion is indicated for neurological and other disorders associated with disturbance of the metabolic functions influenced by B complex vitamins, including

- diabetic polyneuropathy
- alcoholic peripheral neuritis
- polyneuropathy of pregnancy
- toxæmia of pregnancy
- nausea and vomiting of pregnancy
- post-influenzal neuropathies

Neurobion is also recommended for the treatment of neuritis and neuralgia of the spinal nerves, especially facial paresis, cervical syndrome, low back pain, ischialgia, etc.

Interactions with other drugs

Patients under L-dopa medication should not receive drugs with high amounts of vitamins B₆, as the latter leads to a reduction in the dopa effect; this applies also to Neurobion.

Dosage

1 or 2 coated tablets three times daily to treat moderate cases, or to provide interval and follow-up therapy for a course of injections. No signs of hypervitaminosis were noted. The coated tablets are swallowed unchewed with a little liquid with or after meals.

Presentation

Boxes of 500 tablets in blister strips of 10 tablets.

Drugs should be kept in a safe place!
Keep out of reach of children!

依 多 蒙

Neurobion®

MERCK

成份:

每粒糖衣錠含:

Vitamin B ₁ (Thiamine disulphide)	100mg
Vitamin B ₆ (Pyridoxine hydrochloride)	200mg
Vitamin B ₁₂ (Cyanocobalamin)	200mcg

特性:

維生素 B₁, B₆ 及 B₁₂ 是神經正常代謝過程中所不可缺少的，尤其在神經細胞方面。

適應症:

神經炎，神經痛，多發性神經炎，腳氣病，維他命缺乏症。

與其他藥物之相互作用:

接受 (L-dopa) 藥物治療之病人不應服用含有高量維他命 B₆ 之藥物，因為此類維他命可使多巴 (dopa) 療效減輕；此項限制亦適用於 Neurobion (依多蒙糖衣錠)。

劑量及服用法:

本藥須由醫師處方使用一般為一天服三次，每次 1 錠，本藥用水吞服，不必咀嚼，用餐時或飯後服用均可。

服用本藥不會引起維他命過多症。

本藥錠乃用少量水吞服，不必咀嚼，用餐時或飯後服用均可。

包裝:

本藥錠乃用鋁箔熱片粒泡式包裝。

每片 10 錠，備有每盒 500 錠。

本藥品應放置於安全處！

確保孩童取不到！

製造商:

Merck KGaA, Darmstadt, Germany
