

PRIME'S MIXTURE CARMINATIVE

Description: Light pink, cardamon flavoured mixture

Content

Each 5ml contains:

Light magnesium carbonate	150.0mg
Sodium bicarbonate	250.0mg
Tincture Cardamon Co.	0.15ml

Preservatives: Methylparabens	0.1%w/v
Propylparabens	0.01%w/v

Indications

It is used as an antacid.

Pharmacology

Magnesium carbonate is an antacid. Sodium bicarbonate reacts chemically to neutralise or buffer existing quantities of stomach acid but has no direct effect on its output. This action results in increased pH value of stomach contents, thus providing relief of hyperacidity symptoms.

Adverse Effects

Side effects which may occur are chalky taste, diarrhoea, increase in thirst, nausea, vomiting and stomach cramps.

Precautions

Pregnancy/lactation - Risk benefit must be considered as problems in humans have not been documented. Pediatrics - Should not be given to children below 6 years unless prescribed by a physician. In very young children who are receiving magnesium containing antacids, there is a risk of hypermagnesemia, especially in dehydrated children or in those with renal failure.

Drug interactions

Avoid using with antibiotics, medicine containing iron, medicines for epilepsy, tranquilisers, milk and calcium.

Contraindications

It should be contraindicated in patients with severe renal function impairment, undiagnosed gastrointestinal or rectal bleeding and intestinal obstruction.

Dosage and Administration

10 - 20 ml three or four times daily

Storage : Keep container tightly closed.
Store in a cool, dry place below 30°C. Protect from light.

Presentation/Packing : 60ml/ bottle

Shelf-life : 3 years

Manufactured & : **PRIME PHARMACEUTICAL SDN.BHD.**
