What HEXIPREP-T is used for?

It is used as antiseptic and disinfectant that is bactericidal or bacteriostatic against a wide range of bacteria and some viruses, fungi.

How HEXIPREP-T works?

It contains Chlorhexidine Gluconate, an antiseptic and disinfectant effective against a wide range of pathogens.

It contains Ethyl alcohol is bacteriostatic at low concentrations but has bactericidal activity at higher concentrations.

Before you use HEXIPREP-T

When you must not use it

Do not use it if you have a known allergic reaction to chlorhexidine, ethyl alcohol or any of the excipients in the formulation. However, such reactions are extremely rare.

Before you start to use it

Frequent application of alcohol to the skin produces irritation and dry skin.

Since chlorhexidine is irritant it is recommended that it should not be used on the brain, meninges, middle ear or other sensitive tissues.

Taking other medicines

Alcohol should not be brought into contact with some vaccines and skin test injections (patch tests). If in doubt, consult the vaccine manufacturer's literature.
