Indication :

As a Health Supplement

Recommended dose

Adult: Take one capsule twice a day after meal or as recommended by your doctor or pharmacist

Route of administration

Oral

Contraindication

Do not take this product if you are immunocompromised (altered/ weakened immune system) or have central venous catheter

Contraindications: Patients having a central venous catheter. Critically ill patients or immunocompromised patients due to a risk of fungaemia (See section Warnings & Precautions)

Warnings and precautions

Keep out of reach of children

Jauhi dari kanak-kanak

Please consult your doctor/ pharmacist before using this product

There have been very rare cases of fungaemia reported mostly in patients with central venous catheter, critically ill or immuno-compromised patients, most often resulting in pyrexia. In most cases, the outcome has been satisfactory after cessation of treatment by Saccharomyces boulardii, administration of antifungal treatment and removal of the catheter when necessary. However, the outcome was fatal in some critically ill patients (see Section Contraindications & Section Adverse Effects / Undesirable Effects)

Interactions with other medicaments

Unknown

Pregnancy and lactation

This product is not intended to be used by pregnant or lactating women

Adverse Effects/ Undesirable Effects
