What H_2O_2 solution is used for

H_2O_2 solution is used as a disinfectant, antiseptic and mouthwash.

How H_2O_2 solution works

H_2O_2 solution is effective at killing bacteria by destroying their cell wall and H_2O_2 releases oxygen upon application, leaving the applied area clean.

Before using H_2O_2 solution

When you must not use it

When you are allergic to the active or inactive ingredients in H_2O_2 solution.

Before you start to use it

Please consult your doctor or pharmacist before using it.

Taking other medicines

Incompatible with other medicines containing iodides or potassium permanganate.

How to use H_2O_2 solution

How much to use

First Aid for minor cuts, wounds, ulcers and abrasion

Dilute 1 part of H_2O_2 to 1 part of water and apply to affected area.

Removal of dressings from wounds

Dilute 1 part of H_2O_2 to 1 part of water and soak the dressings thoroughly with the solution before removal from wounds.

Mouthwash

Add 1 tablespoon H_2O_2 to half a tumbler of water and use as necessary.

When to use

Follow the directions on the label carefully and as instructed by your doctor or pharmacist.

How long to use

Use as necessary.

If you forget how to use it

Consult your doctor/pharmacist on what you should do if you forget how to use it. You may use it as soon as you remember.

If you use too much (overdose)

Wash immediately with plenty of water, and seek medical attention.

While you are using H_2O_2 solution

Things you must do

Consult your doctor or pharmacist if symptoms persist. The doctor or pharmacist will assess your situation and advise on the need to continue application of H_2O_2 solution.

Things you must not do

Do not administer H_2O_2 solution to treat other complaints unless advised by your doctor.

Things to be careful of

Avoid application on healthy skin and eyes. Bleaches fabric.

Side Effects

- Strong solutions of H_2O_2 produce irritation 'burns' on the skin and mucous membranes.
- Continued use of H_2O_2 as a mouthwash may cause an increase in size of the tiny projections that cover the surface of the tongue (reversible hypertrophy of tongue papillae).

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by calling Tel: 03-78835490, or visiting the website npra.gov.my [Consumers → Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)].

Handling of H_2O_2 solution

During Delivery/Transit

During delivery, the goods must be handled with care with cartons placed carefully without damaging it. When in transit, the bottles in the cartons must not be shaken rigorously. If the carton is damaged, it might affect the caps and bottles which might affect the efficacy of the product.

Physical Inspection of Bottle

Physical Leak Test

Ensure cap is not altered and no liquid leaks. The cap can be damaged if cartons are not handled carefully during delivery.

Visual Bubble test

Before opening the cap, shake the bottle lightly to ensure there are bubbles visually present.

With both tests performed, it is a good indication that the product is good to use. If there is any doubt in the efficacy of the product, kindly contact your supplier for a copy of COA if required.

Storage and Disposal of H_2O_2 solution

Storage

Protect from light and store in a dry place (below 30°C).

Keep out of reach of children.

Disposal

H_2O_2 solution should not be disposed via wastewater or household waste. Ask advice from pharmacist on the correct disposal of the solution once no longer required. This will help to protect the environment.

HYDROGEN PEROXIDE SOLUTION 6% W/V

Consumer Medication Information Leaflet (RiMUP)

Product Description

What it looks like

Clear colourless liquid.

Active ingredient:

- Hydrogen peroxide

Inactive ingredients:

- Benzoic Acid
- Deionized water

MAL Number

MAL07081665XCS

Manufacturer

Sanchuan Medical Sdn. Bhd.
No.72, Lengkok Rishah 2,
