

**Midazolam Kalceks 5 mg/ml**  
 solution for injection/infusion  
 Midazolam  
 5 mg/1 ml  
 10 ampoules of 1 ml  
 Kalceks

1 ml of solution contains 5 mg of midazolam. Each ampoule with 1 ml of solution contains 5 mg of midazolam. Excipients: hydrochloric acid concentrated, sodium chloride, sodium hydroxide, water for injections. Medicinal product subject to medical prescription. Controlled Medicine. Ubat Terkawal. Read the package insert before use. Store below 30 °C. Keep the ampoules in the outer carton in order to protect from light. Do not freeze.  
 Shelf life after dilution  
 Chemical and physical in-use stability has been demonstrated 40 hours at 25 °C and 3 days at 2-8 °C temperature with following infusion solutions: sodium chloride 0.9 %, glucose 5 % and 10 % and Ringers' s solution. From a microbiological point of view, the dilutions should be used immediately. If not used immediately, in-use storage times and conditions prior to use are the responsibility of the user and would normally not be longer than 24 hours at 2°C to 8°C, unless dilution has taken place in controlled and validated aseptic conditions. Keep out of the sight and reach of children.  
 Jauhkan dari pandangan dan jangkauan kanak-kanak.
