What Fungicide Cream is used for

Fungicide Cream is used for treatment of fungal infections of the skin and nails.

How Fungicide Cream works

Miconazole nitrate is an imidazole antifungal agent which works by destroying both the fungus that causes the infection and some of the associated bacteria which may also be present

Before you use Fungicide Cream

- When you must not use it

Do not use Fungicide Cream if:

- you are allergic to miconazole nitrate or similar medicine or any other ingredients of this medicine. ((listed in Product Description))

- Before you start to use it Pregnancy and lactation

Please consult your doctor or pharmacist if you are pregnant, planning for pregnancy or breast-feeding before using any medicine.

- Taking other medicines

Tell your doctor if you are taking any other medicines, including any that you buy

without a prescription from a pharmacy, supermarket or health food shop.

Tell your doctor if you are taking medicine to thin your blood (anticoagulants) such as warfarin

How to use Fungicide Cream

- How much to use

Apply a thin layer onto the affected skin area until recovery.

- When to use it

Apply 2 or 3 times a day or as directed by your doctor or pharmacist.

- How long to use it

Use Fungicide cream for the duration that the doctor or pharmacist recommends.

- If you forget to use it

Apply the missed dose as soon as you remember. If it is almost time for your next dose, wait until then to apply the medicine and skin the missed dose. Do not apply double dose to make up for the missed dose.

- If you use too much (overdose)

Contact your doctor immediately or go to the Emergency Department of your nearest hospital, if you think you or anyone else may have used too much of this medicine. Do this even if there are no signs of discomfort or poisoning. You may need urgent medical attention.

Excessive use may lead to skin irritation, which usually disappears after discontinuation of therapy.

While you are using it

- Things you must do

- Use your medicine exactly as your doctor has told you.
- Tell all the doctors, dentists and pharmacists treating you that you are using Fungicide Cream.

- Tell your doctor immediately if you become pregnant while using this medication.
- Consult your doctor if your condition does not improve or if it becomes worse.

- Things you must not do

- Do not use any new medicines without consulting your doctor or pharmacist.
- Do not give Fungicide Cream to anyone else, even if they have the same symptoms or condition as you.
- Do not stop using the medicine unless advised by your doctor.

- Things to be careful of

- Fungicide Cream must not come into contact with your eyes.

Side effects

Like all medicines, Fungicide Cream can cause side effects, although not everybody gets them.

The most commonly reported side effect during treatment is irritation. If blistering, burning, redness, skin rash or other signs of skin irritation is experienced, discontinue this medication and consult a doctor / pharmacist.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npra.gov.my [Consumers→ Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)]

Storage and Disposal of Fungicide Cream

- Storage

Keep all medicines out of the reach of children.

FUNGICIDE CREAM

Miconazole Nitrate (2% w/w)

Store below 30°C in a dry place
protected from direct light.

- Disposal

Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to throw away medicines you no longer use. These measures will help to protect the environment.
