What Zarin Cream is used for

To be applied on the skin. For the treatment of:

- Ringworm infection of the arms and legs, foot and in the groin.
- Yeast infection.

How Zarin Cream works

Miconazole is a potent antifungal that works by slowing the growth of fungi that cause infection.

Before you use Zarin Cream

- When you must not use it

- Do not use this medicine if you are allergic to Miconazole or any other ingredients in this medicine.

- Before you start use it

Tell your doctor or pharmacist if you:

- are on warfarin therapy

- Taking other medicines

Tell your doctor if you are taking any other medicines, including any that you buy without a prescription from a pharmacy, supermarket or health food shop.

How to use Zarin Cream

- How much to use

Apply a thin layer of Zarin sufficient to cover the affected area and rub well into the skin until the cream has been completely absorbed. The cream should be applied once or twice a day, in the morning and evening, and continued without interruption until the symptoms have completely disappeared (usually 2 to 5 weeks, depending on the infecting organism and the site of infection).

- When to use it

Follow the prescription from your doctor or pharmacist.

- How long to use it

Follow the prescription from your doctor or pharmacist. Ask your doctor or pharmacist before prolonged use of this medicine.

- If you forget to use it

Consult your doctor or pharmacist on what you should do if you forget to use it.

Take the missed dose as soon as you remember. If it is almost time for your next dose, wait until then to take the medicine and skip the missed dose. Do not take a double dose to make up for the missed dose.

- If you use too much (overdose)

Contact your doctor immediately or go to the Emergency Department of your nearest hospital, if you think you or anyone else may have taken too much of this medicine. Do this even if there are no signs of discomfort or poisoning. You may need urgent medical attention.

Accidental ingestion by mouth may cause mild gastrointestinal disturbances.

While you are using it

- Things you must do

Always wash your hand before and after using this cream. Rub the medicine gently on the affected area.

It is advisable to consult a doctor if no improvement is observed in 4 weeks in the case of 'athlete's foot' or 2 weeks in 'jock itch'.

- Things you must not do

This cream is for application on skin only. Do not use in the eyes. Do not swallow it.

Do not take this medicine by yourself without prescription from your doctor or pharmacist.

- Things to be careful of

Tell your doctor or pharmacist if you:

- are allergic to any ingredients in this medicine.

- are taking other medicines at the same time.
- are pregnant or breast-feeding.
- develop viral, fungal or bacterial skin infection.

Side effects

Skin irritation and burning sensation.

Like all medicines, Zarin Cream can cause side effects, although not everybody gets them.

Visit your doctor or pharmacist immediately if you experience any side effects after taking this medicine.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npa.gov.my [Consumers → Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)].

Storage and Disposal of Zarin Cream

- Storage

Store below 30 °C.

Keep out of the reach of the children.

Do not use this medicine after expiry date.

- Disposal

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
