AnvelinTM

Syrup / Tablets

Composition

Syrup : Contains Terbutaline Sulphate 0.03% w/v. Sodium Benzoate 0.1% w/v as preservative.

Tablets: Each tablet contains Terbutaline Sulphate 2.5 mg

Properties

Terbutaline acts selectively on the bronchial muscle to relieve bronchospasm.

Indications

Relief of bronchospasm in asthma and chronic bronchitis.

Dosage and Administration

For oral use only.

Syrup: Adults: 10 to 15 ml three times a day;
Children: 0.075 mg (0.25 ml)/ kg body weight three times a day;

Tablets: Adults: 1 to 2 tablets three times a day;
Children: 7 to 12 years: 1 tablet two or three times a day.

Contraindications

Anvelin should not be used in patients with hyperthyroidism; hypersensitivity to sympathomimetic amines or tachyarrhythmia.

Precautions

Anvelin should be used with care in patients with hyperthyroidism, diabetes mellitus, hypertension or serious cardiovascular disorders, in elderly and pregnant women.

Drug Interactions

Propranolol and other β -blockers may antagonise the effects of terbutaline.

Side Effects

Mild tremor (usually with the hands) may occur in some patients. Other side-effects that may occur include headache, nervous tension, peripheral vasodilatation and tachycardia.

Overdosage

In cases of overdosage and poisoning, hospital admission is advisable. Symptoms include severe forms of side-effects. Significant tachycardia, muscle tremor and superficial vasodilatation are common. Treatment may include gastric lavage. A selective β_1 -blocker may be given intravenously but care must be taken in patients with a history of bronchospasm.

Shelf-life

3 years from the date of manufacture

Presentation

Syrup : Clear, colourless, cola flavoured syrup in packs of 100ml.

Tablets : White, round tablets in packs of 1000's.

Storage

Keep container well closed. Store below 30°C.
