What Kezol Cream is used for

Kezol Cream is used topically to treat fungal and yeast skin infections, including in the groin area.

How Kezol Cream works

It contains ketoconazole, an antifungal which works by killing the fungus that causes the infection.

Before you use Kezol Cream

- When you must not use it

Do not use Kezol Cream if you are allergic to ketoconazole, sodium sulphite or any other ingredients of this medicine (listed in Product Description).

- Before you start to use it

Pregnancy and lactation

Please consult your doctor or pharmacist if you are pregnant, planning for pregnancy or breast-feeding before using any medicine.

If strong corticosteroid medications were used to treat seborrheic dermatitis (a skin condition causing redness and flaking, often on the scalp or face), it is advisable to stop using for two weeks before starting this cream.

- Taking other medicines

Tell your doctor if you are taking any other medicines, including any that you buy without a prescription from a pharmacy, supermarket or health food shop.

How to use Kezol Cream

- How much to use

Adult :

Apply to the infected area once daily. For seborrheic dermatitis, apply twice daily.

- When to use it

Apply once or twice daily depending on the type of infection or as directed by your doctor or pharmacist.

- How long to use it

Use Kezol Cream for the duration that the doctor recommends or until all symptoms disappear.

Continue using the cream for a few days after all symptoms disappear. If no improvement is seen after 4 weeks, stop using the cream and see doctor as soon as possible.

- If you forget to use it

Apply the missed dose as soon as you remember. If it is almost time for your next dose, wait until then to apply the medicine and skip the missed dose. Do not apply a double dose to make up for the missed dose.

- If you use too much (overdose)

Contact your doctor immediately or go to the Emergency Department of your nearest hospital, if you or anyone else may have used too much of this medicine. Do this even if there are no signs of discomfort or poisoning. You may need urgent medical attention.

Using too much of this cream may cause skin irritation and hypersensitivity.

While you are using Kezol Cream

- Things you must do

Use your medicine exactly as your doctor has told you.

Tell all the doctors, dentists and pharmacists treating you that you are using Kezol Cream.

Tell your doctor immediately if you become pregnant while using this medication,

- Things you must not do

Do not stop using the medicine unless advised by your doctor.

Do not use any new medicines without consulting your doctor or pharmacist.

Do not give Kezol Cream to anyone else, even if they have the same symptoms or condition as you.

- Things to be careful of

Avoid contact with eyes.

Make sure to complete the full course of therapy to reduce the risk of infection recurring.

Side effects

Like all medicines, Ketovid Shampoo can cause side effects, although not everybody gets them.

You may experience skin irritation and burning sensation.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring visiting the website npra.gov.my [Consumers→ Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)]

Storage and Disposal of Kezol Cream

- Storage

Store below 30°C. Keep the containers tightly closed.

For external use only. Keep medicine out of reach of children. Protect from light and freezing.

- Disposal

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
