What *Serrata* is used for

Serrata tablets contain serratiopeptidase as active ingredient.

It is used in following conditions:

- As an anti-inflammatory therapy in inflammatory swelling and pus formation, in addition to antibiotic or surgery, or used alone.
- Inflammation after surgery or injury.

Inflammation during the following diseases:

In otorhinolaryngology:

Sinusitis (inflammation of sinuses)

In dentistry:

Pericoronitis (inflammation around root) of wisdom teeth or pus formation of other teeth, when surgery is not possible or advisable.

In gynecology:

Breast swelling and discomfort in the early, after delivery lactation period, caused due to accumulation of milk.

In Urology:

In cystitis (bladder infection) in addition to antibiotic therapy.

How *Serrata* works

Serrata acts by dissolving fibrin, reducing inflammation, reducing oedema and inactivating Bradykinin (A factor responsible for inflammation). It is able to increase the diffusion of antibiotics and cytostatic agents in tissue.

Before you use *Serrata*

When you must not use it

Hypersensitivity to Serratiopeptidase or any of the excipients.

Gastric ulcers induced in the upper digestive tract.

In infants and young children.

Pregnancy and lactation

Patient should consult a doctor or pharmacist before using *Serrata* in pregnant woman or woman suspected of being pregnant.

Before you start use it

Talk to your pharmacist or doctor:

If you are pregnant or breastfeeding

Taking other medicines

In concurrent usage with anticoagulants, the preparation intensifies their activity. Such combination should be used under careful medical supervision.

How to use *Serrata*

How much to use

Use as directed by your doctor or pharmacist.

When to use it

Use as directed by your doctor or pharmacist.

How long to use it

Continue taking *Serrata* for as long as your doctor recommends.

If you forget to use it

Consult your doctor or pharmacist on what you should do if you forget to use it.

Take the missed dose as soon as you remember. If it is almost time for your next dose, wait until then to take the medicine and skip the missed dose. Do not take a double dose to make up for the missed dose.

If you use too much (overdose)

Contact your doctor immediately or go to the Emergency Department of your nearest hospital, if you think you or anyone else may have taken too much of this medicine. Do this even if there are no signs of discomfort or poisoning. You may need urgent medical attention.

Acute overdosage of *Serrata* would not be expected to lead a life-threatening situation.

While you are using it

Things you must do

Take your medicine exactly as your doctor has told you.

Tell all the doctors, dentists and pharmacists that are treating you that you are taking *Serrata*.

Tell your doctor immediately if you become pregnant while taking this medication.

Things you must not do

Do not stop taking the medicine unless advised by your doctor.

Do not take any new medicines without consulting your doctor.

Do not give *Serrata* to anyone else, even if they have the same symptoms or condition as you.

Things to be careful of

This medicine does not affect your ability to drive or use machines. If the tablets make you feel sick, dizzy or tired, or give you a headache, do not drive or use machines and contact your doctor immediately.
