CREAM

**INDICATION:**

Treatment of herpes simplex virus infection of the skin including genital herpes and herpes labialis.

**DIRECTION FOR USE:**

For adults, children and geriatric: apply cream to the affected area 5 or 6 times daily for 5 to 10 days. Acyclovir cream should be applied to the lesions as early as possible after the start of an infection and particularly important to start treatment of recurrent episodes during the prodromal period or when the lesions first appear.

**PRECAUTION:**

Acyclovir cream should not be applied to mucous membranes, eg. in the mouth, eyes or vagina. In severely immune-compromised patients (eg. AIDS patients or bone marrow transplant recipients), oral acyclovir dosing should be considered.
