Winding direction:

For BDY only

The diagram illustrates the winding direction for BDY (Back Driven Yarn) only. It shows a cross-section of a woven fabric with a central black 'F' shaped pattern. Dimensions are labeled: L (length of the pattern), B (width of the pattern), d (thickness of the fabric), and D (max.) (maximum diameter of the roll). The winding direction is indicated by a curved arrow pointing clockwise around the roll.
