The diagram illustrates the technical specifications for a medicine box, including dimensions, layout, and content. The box is shown in a perspective view, with dimensions in millimeters (mm) indicated throughout.

Dimensions:

- Overall width: 502.4 mm
- Overall height: 249 mm
- Top flap width: 246.9 mm
- Top flap height: 16 mm
- Side flap width: 61 mm
- Side flap height: 97 mm
- Front panel width: 58 mm
- Front panel height: 101.6 mm
- Back panel width: 51.5 mm
- Back panel height: 57.2 mm
- Bottom flap width: 58 mm
- Bottom flap height: 16 mm

Content and Layout:

- Top Flap:** Contains the Pharmacode Area (Pharmacode No.: TBD) and the CMO code Area (if applicable). The area for the Tamper Seal position is also indicated.
- Front Panel:** Features the product name "Abraxane® for Injectable Suspension 100 mg" and the indication "(paclitaxel protein-bound particles for injectable suspension) (albumin-bound)". It also includes the dosage "100 mg" and the text "Cytotoxic Agent Controlled Medicine Sterile". The front panel also displays the product registration holder information and the manufacturer's details.
- Back Panel:** Contains the product name "Abraxane® for Injectable Suspension 100 mg" and the indication "(paclitaxel protein-bound particles for injectable suspension) (albumin-bound)". It also includes the dosage "100 mg" and the text "Cytotoxic Agent Controlled Medicine Sterile". The back panel also displays the product registration holder information and the manufacturer's details.
- Bottom Flap:** Contains the product name "Abraxane® for Injectable Suspension 100 mg" and the indication "(paclitaxel protein-bound particles for injectable suspension) (albumin-bound)". It also includes the dosage "100 mg" and the text "Cytotoxic Agent Controlled Medicine Sterile". The bottom flap also displays the product registration holder information and the manufacturer's details.

Other Details:

- The box is made of material with a Glossy Acrylic Varnish finish.
- The box is designed to be cut along the indicated lines.
- The box is designed to be used for the storage and transport of the medicine.
