What is parodontax Daily Fluoride Toothpaste

Parodontax Fluoride Toothpaste contains the actives Sodium fluoride and Sodium bicarbonate which helps to fight gum swelling and bleeding caused by gum disease. It also prevents tooth decay, plaque and tartar build up giving you healthier teeth.

How parodontax Daily Fluoride Toothpaste works

Parodontax is specially designed to physically remove the cause of bleeding gums by targeting the buildup of bacteria along the gum line, helping to keep the seal between your gums and teeth tight. It is suitable for daily use as it also strengthens teeth and freshens breath.

Before you use parodontax Daily Fluoride Toothpaste

- When you must not use it
Do not use if you are allergic to any of the ingredients.
- Before you start use it
Not suitable for children under 12 years.
- Taking other medicines
As with other oral care products, if irritation occurs discontinue use.

How to use parodontax Daily Fluoride Toothpaste

- How much to use
Brush twice a day and not more than three times. Do not swallow, spit and rinse after use
- When to use it
Twice a day and not more than three times.
- How long to use it
Used daily for as long as your dentist recommends.
- If you forget to use it
Use as soon as you remember.
- If you use too much (overdose)
Theoretically, acute over dosage is possible in children but symptoms of fluoride toxicity would only arise after ingestion of the entire product. Symptoms may include salivation, nausea, vomiting and diarrhea.

While you are using it

- Things you must do
Always follow the label.
- Things you must not do
Do not use for children under 12 years.
- Things to be careful of
Always follow the label.
Minimize swallowing and spit out.

Side effects

Minor local irritations.

Very rarely hypersensitivity type reactions such as angioedema, oral and facial swelling have been reported in consumers, particularly those predisposed to hypersensitivity reactions.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website portal npra.gov.my [Consumers → Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)].

Storage and Disposal of parodontax Daily Fluoride Toothpaste

- Storage
Keep out of the reach of children. Do not store above 30 °C.
- Disposal
Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist / dentist on how to dispose of medicines no longer required. These measures will help to protect the environment.
