What ENAPRIL TABLET is used for

ENAPRIL TABLET is used to reduce high blood pressure and other heart conditions. Consult your doctor before using this product.

How ENAPRIL TABLET works

Enalapril blocks angiotensin converting enzyme which results in decreased of plasma angiotensin II that consequently leads to reduction in blood pressure.

Before you use ENAPRIL TABLET*When you must not take it*

You must not take ENAPRIL TABLET if you are pregnant, or you have a history of allergy or medical conditions towards any components in ENAPRIL TABLET.

Before you start to take it

Tell your doctor if you are taking any other medicines or you have any other health problems.

Taking other medicines

ENAPRIL TABLET may cause unwanted effects if used together with other medicines such as anti-hypertensive drugs, potassium containing drugs and supplements. Tell your doctor or pharmacist if you are taking any other medicines.

How to take ENAPRIL TABLET*How much to take*

The dosage you need depends on your medical condition. Please consult your doctor for further enquiries.

When to take it

ENAPRIL TABLET should be taken orally with or without food.

How long to take it

ENAPRIL TABLET should be taken according to doctor's advice.

If you forgot to take it

If you miss a dose of ENAPRIL TABLET and you are taking it regularly, take it as soon as possible. If several hours have passed or if it is nearing time for the next dose, do not double the dose to catch up, unless advised by your health care provider. Do not take 2 doses at once.

If you take too much

Quickly seek for medical attention if you think that you or anyone else has taken too much ENAPRIL.

While you are using ENAPRIL TABLET*Things you must do*

Follow your doctor's prescription when you are using ENAPRIL TABLET.

Things you must not do

Do not stop taking this medicine or change the dosing regimen without instruction of your doctor. Do not give ENAPRIL TABLET to anyone else, even if they have the same condition as you.

Things to be careful of

Should be used with caution in patient with heart problems, impaired renal function, lactating women and children. ENAPRIL TABLET is not recommended for use in pregnant women.

Side effects

Commonly observed: headache and dizziness.

Less commonly observed: fatigue and asthenia.

Rarely observed: hypotension, orthostatic hypotension, nausea, diarrhea, muscle cramps, rash and cough, renal dysfunction, renal failure and oliguria.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npra.gov.my [Consumers → Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)].

Storage and Disposal of ENAPRIL TABLET*Storage*

Store below 25°C. Protect from light and moisture.

Disposal

ENAPRIL TABLET should be disposed when your doctor or pharmacist tells you to stop taking this tablet or it has passed the expiry date. Ask your pharmacist how to dispose medicines that are no longer required. Medicines should not be disposed of via wastewater or household waste. These measures will help to protect the environment.
