## What ANLODIN TABLET is used for

It is used for treatment of high blood pressure, myocardial ischemis and angina either in monotherapy or combination therapy with other related drugs.

## How ANLODIN TABLET works

ANLODIN TABLET is a calcium ion influx inhibitor that inhibits the entering of calcium ions into cardiac and vascular smooth muscle. This results in a direct relaxant effect on vascular smooth muscle.

## Before you use ANLODIN TABLET

### - When you must not use it

When you are allergic to amlodipine besylate.

### - Before you start to use it

Tell your doctor if you are using any other medicines.

### - Taking other medicines

Tell your doctor if you are taking any other medication. There may be an interaction between other groups of drugs.

## How to use ANLODIN TABLET

### - How much to use

For hypertension and angina, the usual initial dose is 5mg once daily, may be increased to a maximum of 10mg once daily based on individual patient's response. No dose adjustments are needed with concomitant administration of thiazide diuretics, beta blockers and angiotensin-converting enzyme inhibitors.

### - When to use it

ANLODIN TABLET should be taken according to doctor's instruction.

### - How long to use it

ANLODIN TABLET should be taken according to doctor's prescription.

### - If you forget to use it

If you miss a dose of ANLODIN TABLET and you are taking it regularly, take it as soon as possible. If several hours have passed or if it is nearing time for the next dose, do not double the dose to catch up, unless advised by your health care provider. Do not take 2 doses at once.

### - If you use too much (overdose)

Quickly seek for medical attention if you think that you or anyone else have taken too much ANLODIN TABLET.

## While you are using ANLODIN TABLET

### - Things you must do

Take the tablet according to doctor's prescription.

### - Things you must not do

Do not stop taking this medicine or change the dosing regimen without instruction of your doctor. Do not give ANLODIN TABLET to anyone else, even if they have the same condition as you.

### - Things to be careful of

Should be used with caution in patient with impaired renal function, patients with impaired hepatic function, children and elderly.

## Side effects

*Commonly observed:* headache, edema, fatigue, nausea, flushing and dizziness.

*Less commonly observed:* itching, rash, shortness of breath, weakness, muscle cramps, stomach upset, and overgrowth of gum tissue.

*Rarely observed:* skin disorder due to allergy or infection.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website [npra.gov.my](http://npra.gov.my) [Consumers→Reporting Side Effects to Medicine (ConSERF) or Vaccines (AEFI)]

## Storage and Disposal of ANLODIN TABLET

### - Storage

Store below 30°C, protect from light & moisture.
