

free flex[®]

250 ml

Voluven[®]
6% solution for infusion

100

Hydroxyethyl starch (HES 130/0.4) in isotonic sodium chloride solution

1 litre contains:

Poly(O-2-hydroxyethyl)starch 60.00 g

- Molar substitution 0.38 – 0.45

- Mean molecular weight (M_w) = 130,000

200

Sodium chloride 9.00 g

Electrolytes: Na⁺ 154 mmol/l Cl⁻ 154 mmol/l

Other ingredients: Sodium hydroxide, hydrochloric acid (25%), water for injections.

Theoretical osmolarity: 308 mosm/l

300

Titrateable acidity: < 1.0 mmol NaOH/l

pH: 4.0 – 5.5

For continuous intravenous infusion

Maximum daily dose: 50 ml/kg b.w.

To be used immediately after the bag is opened.

Do not use Voluven[®] after expiry date.

Any unused solution should be discarded.

Use only clear solutions and undamaged containers.

400

Keep out of reach of children. Jauhi daripada kanak-kanak

Do not freeze. Do not store above 30°C.

Batch no.:

Manufact. date:

Expiry date:

MAL20031761ARZ

Product Registration Holder/Importer:

Fresenius Kabi Malaysia Sdn Bhd (535495-W),
3-1 & 3-2, Axis Technology Centre, Lot 13, Jalan 51A/225,
46100 Petaling Jaya, Selangor Darul Ehsan, Malaysia

Fresenius Kabi Deutschland GmbH
Freseniusstraße 1, 61169 Friedberg,
Germany
