THELBAN

Albendazole

TABLET AND SUSPENSION

COMPOSITION :

THELBAN TABLET

Each tablet contains :-

Albendazole

200 mg

THELBAN SUSPENSION

Each 5 ml contains :-

Albendazole

100 mg

Methylparaben (as preservative) 0.15%

Propylparaben (as preservative) 0.02%

ACTIONS AND INDICATIONS:

THELBAN is an anthelmintic which exhibits vermifugal, ovicidal and larvacidal activity in the treatment of Roundworm (*Ascaris lumbricoides*), Whipworm (*Trichuris trichiura*), Pinworm or Threadworm (*Enterobius vermicularis*), Hookworm (*Ancylostoma duodenale* and *Necator americanus*), *Strongyloides stercoralis*, *Taenia solium*, *Taenia saginata* and *Opisthorchis viverrini*.

ADVERSE EFFECTS :

Since Albendazole is poorly absorbed from the gastro-intestinal tract at the usual therapeutic doses, side-effects have been generally been restricted to gastro-intestinal disturbances such as transient abdominal pain and diarrhoea. However, adverse effects have been reported more frequently with high doses tried in the treatment of hydatid disease and have included allergic reactions, raised liver enzyme values, leucopenia and alopecia.

PRECAUTIONS AND WARNING :

Patients receiving high doses of Albendazole such as those with hydatid disease, should be supervised closely.

CONTRA-INDICATIONS :

Albendazole should not be administered during pregnancy or in women thought to be pregnant.

DOSAGE AND ADMINISTRATION :

Adults and children over 2 years of age :

- The usual dosage is 400 mg as a single dose with meals.
- In cases of *Strongyloides* infestation : The usual dosage is 400 mg once daily for three consecutive days.
- In cases of *Opisthorchis viverrini* : The usual dosage is 400 mg twice daily for three consecutive days.

OVERDOSAGE-SYMPTOMS, TREATMENT, SUPPORTIVE THERAPY, ANTIDOTE (S) :

No symptoms of overdosage have been reported. Should they occur, symptomatic treatment should be provided.

STORAGE :

Store at temperature not exceeding 30°C.

Keep medicine out of reach of children.

Jauhkan daripada kanak-kanak.
