Ultiwell Injection 5mg

[Composition] The key component is remifentanyl hydrochloride and the excipient is glycine.

[Appearance] A white or off-white loose blocks.

[Indication] Ultiwell is indicated as an analgesic agent for use during induction and/or maintenance of general anaesthesia during surgical procedures including cardiac surgery, and also for continuation of analgesia into the immediate post-operative period under close supervision.

[Route of Administration] For intravenous administration after reconstitution and dilution (see the package insert for details).

[Pack size] 5mg of remifentanyl lyophilized powder in 10ml vials in cartons of 5 vials.

[Storage Condition] Store below 25°C, well-sealed.

The reconstituted solution of Ultiwell is chemically and physically stable for 24 hours at room temperature (25°C). However, Ultiwell does not contain an antimicrobial preservative and thus care must be taken to assure the sterility of prepared solutions, reconstituted product should be used promptly, and any unused material discarded.

[Adverse Reactions] [Contraindications] [Precautions] See the package insert for details.
