1. What Urobase is used for

Urobase is indicated for the relief of the symptoms of cystitis in women.

2. How Urobase works

Urobase works to increase the pH in the urinary system. Therefore, making your urine less acidic. The actual dissolution of uric acid stones may be achieved by maintaining an alkaline urine.

3. Before you use Urobase

-When you must not use it

Patient with diabetes, heart disease, hypertension, history of renal disease or those who on a low salt diet. Talk with your doctor if you are unsure if Urobase is right for you.

-Pregnancy and lactation

Contraindicated during pregnancy and lactation.

-Before you start using it

Tell your doctor before you start to take this medicine:

- If you have any kidney problems.
- If you have heart problems.
- If you are on a low sodium diet.
- If you have diabetes or/and hypertension

-Taking other medicines.

Tell your doctor if you are taking any other medicines, including any that you buy from pharmacy, supermarket or health food shop without a prescription.

4. How to use Urobase

-How much to use

One sachet to be taken three times daily. Dissolve the contents of one sachet (4.1g) with 125 ml (half glass) of water. Stir well and drink immediately.

-When to use it

Use as directed by your doctor or pharmacist.

How long to use it

Continue use of this drug for a period of time prescribed by your doctor.

-If you forget to use

Take the missed dose as soon as you remember. If it is almost time for your next dose, wait until then to take the medicine and skip the missed dose. Do not take a double dose to make up for missed one.

-If you use too much (overdose)

Contact your doctor immediately or go to the emergency department of your nearest hospital, if you think you or anyone else may have taken too much of this medicine. Do this even if there are no signs of discomfort or poisoning. You may need urgent medical treatment.

5. While you are using it

-Things you must do

- Take your medicine exactly as your doctor has told you.
- Tell all the doctors, dentists and pharmacists that are treating you that you are taking Urobase.
- Tell your doctor immediately if you become pregnant while taking this medication.

-Things you must not do

- Do not stop taking the medicine unless advised by your doctor.
- Do not take any new medicines without consulting your doctor.
- Do not share Urobase to anyone else, even if they have the same symptoms or condition as you.

-Things to be careful of

Like other medicine, Urobase may cause side effects even though not all will experience the side effects. Visit your doctor or physician if you have any side effects after taken this medicine.

6. Side effects

Side effect of Urobase sachet is mild diuresis (many urine).

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website nprra.gov.my (Consumer → Reporting Side Effects to Medicines [ConSERF] or Vaccines [AEFI])
