

TOCOVID

SupraBio

With the new bio-optimum absorption system, the contents of the soft gelatin capsule forms emulsion instantly upon contact with the fluid in our stomach. Therefore its absorption no longer depends on food and fat intake. Not only does this increase the absorption of Tocotrienols by **200% to 300%**, but a more consistent and complete absorption is ensured.

Tocotrienols in TOCOVID *SupraBio* are important as they protect the body cells from damages by being a substitute target for free radicals.

Free radicals are very reactive. They attack healthy cells. We are most often subjected to free radicals from air pollution, cigarette smoke, UV radiation, fried and burnt food and from food contaminants like pesticides. If their effects are not neutralized, free radicals may pose a potential health hazard to our body.

Tocotrienols are mostly extracted in their natural form from palm oil and rice bran oil. Among these two, palm tocotrienols possess a higher content of delta- and gamma-tocotrienol, 2 of the more potent tocotrienols.

WITOC43-var2

Recommended Dosage

50mg / 100mg : 1 to 2 soft gelatin capsules a day.
200mg : 1 soft gelatin capsule a day.

Packing

50mg soft gelatin capsule x 30's, 60's.
100mg soft gelatin capsule x 30's, 60's.
200mg soft gelatin capsule x 30's.

Storage

Store below 25°C.
Protect from light and moisture.

Safety

Toxicological and pharmacological studies indicate that palm Tocotrienols are safe even when consumed at doses as high as 2500mg/kg body weight. No adverse effect has been reported. Furthermore, its contents are all natural, conferring only the best benefits phytonutrients can offer.
