What Tinazol Cream is used for

Tinazol Cream contains a medicine called miconazole. This belongs to a group of medicines called "antifungals".

Tinazol Cream is used for infections of the skin or nails caused by fungi including yeasts and some bacteria. Infections may appear on the:

- hands or feet
- Scalp or outer ear
- Groin

Tinazol cream works by destroying the fungus and associated bacteria which may be present.

How Tinazol Cream works

Miconazole acts as an antifungal by altering cell membrane permeability, resulting in the cell membrane being unable to function as a selective barrier. There is little systemic absorption when miconazole is applied topically.

Before you use Tinazol Cream

- When you must not use it

Do not take this medicine if:

- you are known to be hypersensitive to any of the ingredients.

Do not take this medicine after the expiry date printed on the pack or if the packaging is damaged.

Pregnancy and lactation

Caution is recommended during pregnancy and lactation period.

- Before you start use it

Tell your doctor or pharmacist if:

- you are allergic to any of the ingredients in the cream.
- you are on warfarin therapy.

- Taking other medicines

Tell your doctor if you are taking any other medicines, including any that you buy without a prescription from a pharmacy, supermarket or health food shop.

How to use Tinazol Cream

- How much to use

Adults and children

- Tinea pedis, Tinea cruris (fungal infection that affects the skin of genital, inner thighs and buttocks), Tinea corporis, cutaneous candidiasis (skin fungal infections caused by yeasts)

Topical/apply to the skin, one or two times a day for 2 to 4 weeks.

- Tinea versicolor (body whitespots)

Topical/apply to the skin, once a day.

Follow all directions given to you by your doctor and pharmacist carefully. They may differ from the information contained in this leaflet. If you do not understand the instructions on the label, ask your doctor or pharmacist for help.

- When to use it

Use as directed by your doctor or pharmacist.

- How long to use it

Continue taking Tinazol Cream for as long as your doctor recommends.

- If you forget to use it

Consult your doctor or pharmacist on what you should do if you forget to use it.

Take the missed dose as soon as you remember. If it is almost time for your next dose, wait until then to take the medicine and skip the missed dose.

Do not take a double dose to make up for the missed dose.

- If you use too much (overdose)

Contact your doctor immediately or go to the Emergency Department of your nearest hospital, if you think you or anyone else may have taken too much of this medicine. Do this even if there are no signs of discomfort or poisoning. You may need urgent medical attention.

If you take too much of this medicine you may have ingestion-mucous membrane irritation, anorexia, nausea, vomiting and diarrhoea.

While you are using it

- Things you must do

Take your medicine exactly as your doctor has told you.

Tell all the doctors, dentists and pharmacists treating you that you are taking Tinazol Cream.

Tell your doctor immediately if you become pregnant while taking this medication.

- Things you must not do

Do not stop taking the medicine unless advised by your doctor.

Do not take any new medicines without consulting your doctor.

Do not give Tinazol Cream to anyone else, even if they have the same symptoms or condition as you.

Avoid in contact with your eyes.

Do not apply occlusive dressing over this medication unless directed to do so by physician.

Do not use in children under 2 years of age except under the advice and supervision of a doctor.

- Things to be careful of

Driving and using machines

Tinazol Cream is not likely to affect you being able to drive or use any machines.

TINAZOL CREAM 2%

Miconazole nitrate (2% w/w)
