

BIOSPRAY 1% SOLUTION

Description and Composition

BIOSPRAY 1% SOLUTION is a dark brown viscous solution antiseptic spray. Each ml contains 10mg of Iodine as its active ingredient.

Pharmacodynamics

The product is an aqueous solution of povidone iodine, it has antiseptic and antifungal properties of iodine. It is also active on spore forms of bacteria, yeasts and fungi.

Pharmacokinetics

The absorption of the povidone-iodine by the skin and mucous membranes is virtually zero. In contact with the tissues and mucous membranes, povidone iodine complex dissociates and slowly releases iodine prolonging the activity of the product.

Indication

As an aid in the treatment and control of bacterial infections of superficial wounds, cuts and abrasions, navel stumps, dockings, and castration wounds. Also, for disinfection of skin areas prior to injections or surgical procedures.

Target species

Cattle, horse, sheep and pigs. 

Recommended Dose

Holding the bottle upright and 15 cm from the skin spray a thin film over the affected area by depressing the pump.

Route of Administration

External route.
Spray from a distance

Contraindication

Do not use in case of hypersensitivity to the active substances or to any of the excipients.
