What Dyna Antiseptic Cream is used for

Indicated for burns, boils, minor wounds and cuts and insect bites. Provides antiseptic and soothing action to the skin.

How Dyna Antiseptic Cream works

Cetrimide – Used as properties of disinfectant and antiseptic.

Glycerol – Used for its water-retaining and emollient properties in dermatological preparations. It absorbed moisture from exposed or inflamed tissues and mucous membranes when applied undiluted.

Before you use Dyna Antiseptic Cream

- When you must not use it

Pregnancy and lactation

Ask your doctor or pharmacists for advice before taking Dyna Antiseptic Cream.

- Before you start to use it

Tell your doctor if you are sensitive to the ingredients in the medicine

- Taking other medicines

Tell your doctor if you are taking any other medicines, including any that you buy without a prescription from a pharmacy, supermarket or health food shop.

How to use Dyna Antiseptic Cream

- How much to use

For wounds and cuts: Wash the affected area with warm water and apply the cream 3 to 4 times daily.

For burns and boils: Apply cream to cover the affected area 3 to 4 times daily

The directions given may differ from the information contained in this leaflet. If you do not understand the instructions on the label, ask your doctor or pharmacist for help.

- When to use it

Use as directed by your doctor or pharmacist.

- How long to use it

Continue taking Dyna Antiseptic Cream for as long as your doctor recommends.

- If you forget to use it

Take the missed dose as soon as you remember. If it almost time for your next dose, wait until then to take the medicine and skip the missed dose. Do not take a double dose to make up for the missed dose.

- If you use too much (overdose)

No reports regarding overdose

Contact your doctor immediately or go to the Emergency Department of your nearest hospital, if you think you or anyone else may have taken too much of this medicine. Do this even if there are no signs of discomfort or poisoning. You may need urgent medical attention.

While you are using it

- Things you must do

Take your medicine exactly as your doctor has told you.

Tell the doctor, dentist and pharmacist treating you that you are using Dyna Antiseptic Cream.

- Things you must not do

Do not take any new medicines without consulting your doctor or pharmacist.

Do not give Dyna Antiseptic Cream to anyone else, even if they have the same symptoms or condition as you.

- Things to be careful of

Prolonged and repeated applications of the preparation to the skin are inadvisable as hypersensitivity may occur.

Side effects

At the concentrations used on the skin, Cetrimide does not generally cause irritation, but some people become hypersensitive to Cetrimide after repeated application.

Visit your doctor or pharmacist immediately if you experience any side effects after taking this medicine. You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by calling Tel: 03-78835549, or visiting the website npra.gov.my (Consumers→ Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI).

Storage and Disposal of Dyna Antiseptic Cream

- Storage

Keep out of reach of children

Protect from light

Store in dry place below 30°C

Keep the container tightly closed

For external use only

- Disposal

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
