DYANIL TABLET 5MG

MAL19910070AZ
BLISTER PACK OF 100 X 10's
CONTROLLED MEDICINE

EACH TABLET CONTAINS:
Glibenclamide 5 mg

INDICATION:

Non-insulin-dependent diabetes mellitus (type II, maturity-onset diabetes) whenever dietary treatment alone proves inadequate.

DOSE:

Stabilisation should be instituted by a doctor only. Swallow whole with some liquid. Treatment is started with a daily dose of half a tablet (2.5 mg), taken immediately before breakfast. If necessary, raise the dose in increments of 2.5 mg until the blood glucose levels have been normalised. As a rule, the maximum effect is obtained with 3 tablets daily, in exceptional cases 4 tablets daily. A maximum single dose of 2 tablets (10 mg) should not be exceeded. It is to be taken before breakfast, any remaining portion before the evening meal.

Please refer to the package insert for detailed information.
Gelatin used is bovine in origin.

STORAGE CONDITIONS:

JAUHKAN UBAT DARIPADA KANAK-KANAK
KEEP OUT OF REACH OF CHILDREN
Do Not Store Above 30°C
