What Dynamizole Cream 2% w/w is used for

Dynamizole Cream 2% w/w is used for treating infection of the skin by fungi including yeast.

Dynamizole Cream 2% w/w is used for:

- Infection on scalp, the beard, the trunk, the feet and hand in the groin;
- Diapers rash in babies.

How Dynamizole Cream 2% w/w works

Miconazole Nitrate - an antifungal which works by destroying both the fungus that causes the infection and some of the associated bacteria which may also be present.

Before you use Dynamizole Cream 2% w/w**- When you must not use it**

Do not use Dynamizole Cream 2% w/w if you know you are hypersensitive to it or to other of its excipients.

Pregnancy and lactation***Pregnancy***

Dynamizole Cream 2% w/w is minimally absorbed into the skin/nail. If you are pregnant or planning to become pregnant, ask your doctor if you should use Dynamizole Cream 2% w/w.

Lactation

It is not known whether the active ingredient is excreted in human breast milk. If you are nursing, ask your doctor if you should use Dynamizole Cream 2% w/w.

- Before you start to use it

Oral anticoagulants (blood thinning medications): Ask your doctor or pharmacist before use if you are taking an oral blood thinning medication, such as warfarin.

- Taking other medicines

Other medications: The effects and side effects of some other prescription medications, when taken with Miconazole, can be increased. Ask your doctor or pharmacist before use if you are taking any other medications.

How to use Dynamizole Cream 2% w/w

For successful treatment, apply Dynamizole Cream 2% w/w every day.

- Apply Dynamizole Cream 2% w/w to the skin twice a day.
- To open the tube, unscrew the cap. Then pierce the seal of the tube using the pin on the top of the cap.

Wash the infected skin and dry it well. Rub Dynamizole Cream 2% w/w gently into the skin with your fingertips. Do not treat the infected skin alone. Apply the product to the area around it also.

Wash your hands carefully after applying the cream. This is particularly important to avoid transferring the germs of the infected skin to other parts of the body or to other people.

- How much to use

Apply twice a day.

- When to use it

Always take this medicine exactly as your doctor told you. Please ask your doctor or pharmacist if you are not sure.

- How long to use it

Do not stop using the medicine until at least a week after all symptoms have disappeared. Depending on the type and extent of the infection, the treatment may last 2 to 6 weeks.

Follow the advice of your doctor with regard to length of treatment. Please ask your doctor or pharmacist if you are not sure.

- If you forget to use it

- Do not apply the missed dose of the medicine
- Apply the next dose of the medicine as usual and keep using the medicine as your doctor has told you.
- Do not use as double dose of the medicine to make up for a missed dose.

- If you use too much (Overdose)

When Dynamizole Cream 2% w/w is applied more frequently than prescribed; it may cause some redness, swelling or a burning sensation. In this case, it is sufficient to skip one or two applications and start again accordingly to the normal scheme.

Accidentally swallowing of the small amount of Dynamizole Cream 2% w/w is normally harmless.

If this occurs, seek medical attention immediately. Call your doctor to make sure there are no problems.

While you are using Dynamizole Cream 2% w/w**- Things you must do**

Wash your hand carefully after you have used Dynamizole Cream 2% w/w except if the treatment is for your hands.

Keep a towel and a washcloth for your own use. In this way you avoid infecting other people.

Regularly change clothing which comes into contact with the infected skin in order to avoid re-infecting yourself.

- Things you must not do

Do not apply Dynamizole Cream 2% w/w to the eyes.

- Things to be careful of

Dynamizole Cream 2% w/w can cause severe allergic reactions. You must be aware of the signs of an allergic reaction while you are taking Dynamizole Cream 2% w/w. See "Side effects".

Driving and using machines

Dynamizole Cream 2% w/w is not likely to affect you being able to drive or use any tools or machines.

DYNAMIZOLE CREAM 2% W/W
