What Dyna CWC Solution is used for

It is used to treat corns, warts and calluses.

How Dyna CWC Solution works

It contains Salicylic Acid which has keratolytic properties that can soften the keratin. This causes the outer layer of the skin to loosen and shed.
It also contains Lactic Acid which helps to enhance the topical keratolytic action of salicylic acid.

Before you use Dyna CWC Solution

When you must not use it

If you are allergic to Salicylic Acid and Lactic Acid or other ingredients of Dyna CWC Solution.

Do not use for infants under 2 years old. There is no information about the safety of Dyna CWC Solution in pregnant women. The ingredients of Dyna CWC Solution may pass into breast milk. Dyna CWC Solution is not recommended for use during pregnancy and lactation.

Before you start to use it

Consult your doctor or pharmacist before use especially if you have: diabetes, poor blood circulation (e.g., peripheral vascular disease) or skin infection irritation.

Taking other medicines

You should not use any other treatments on your corn, wart and callus at the same time as using Dyna CWC Solution. Please inform your doctor or pharmacist if you are using other medicines, including medicines obtained without a prescription.

How to use Dyna CWC Solution

How much to use

Apply Dyna CWC solution twice daily directly to the affected area. Make sure the affected area is clean and dry before applying. Avoid applying to the healthy surrounding skin.

Procedure for application:

Step 1 : Soak the corn, wart and callus in warm water for 5 minutes and dried thoroughly with a clean towel.
Step 2 : Using nail file, pumice stone,

emery board or coarse washcloth, carefully rub along the surface of the corn, wart and callus.

Step 3 : Apply a thin layer of Dyna CWC solution by using the dropper directly to the corn, wart and callus. Avoid applying to the healthy surrounding skin.

Step 4 : Allow the solution to dry thoroughly and cover with plaster.

For adults, the elderly and children aged 2 years and over. Use in children should be under the supervision of an adult. You are advised to consult a pharmacist or doctor if you do not understand the instructions on the label or if skin irritation develops.

When to use it

When corns, warts or calluses appear. Make sure the affected area is clean and dry before applying.

How long to use it

Not recommended for prolonged use. You should check with your doctor or pharmacist.

If you forget to use it

Apply as soon as you remember, and continue to use it as you would normally.

If you use too much (overdose)

Usage according to the recommended dose, would rarely cause overdose.

While you are using Dyna CWC Solution

Things you must do

Tell your doctor or pharmacist that you are using Dyna CWC Solution. Tell your doctor immediately if you become pregnant while using this medication.

Things you must not do

Do not use if you are known hypersensitive to any of the ingredients.

Things to be careful of

If using over a long periods, in high concentrations, on large area of the body or on inflamed or broken skin may make the chance of getting side effect higher. Take care not to get Dyna CWC Solution on healthy skin as this may cause irritation. Avoid contact with mouth, eyes, and other mucous membranes.

Side effects

Salicylic acid is a mild irritation and application of salicylic acid preparation to the skin may cause dermatitis.

Salicylic acid is readily absorbed through skin, and symptoms of acute systemic salicylate poisoning may be occur after excessive use.

Stop using this medication and tell your doctor immediately if serious side effects occur.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npa.gov.my (Consumers → Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)).
