What Neuromethyn is taken for
Neuromethyn is used to treat nerve damage and a specific type of anemia (low red blood cells) caused by vitamin B12 deficiency.

How Neuromethyn works

Neuromethyn contains mecobalamin (vitamin B12) as active ingredient. It works by repairing and protecting nerve fibers, which help reduce pain or tingling from nerve damage. It also help increase the production of red blood cells.

Before you take Neuromethyn

- When you must not take it

Do not take this medicine if:

- you are allergic to mecobalamin, cobalt or any other ingredients of this medicine (listed in Product Description).

- Before you start to take it

Pregnancy and lactation

Please consult your doctor or pharmacist if you are pregnant, planning for pregnancy or breast-feeding before using any medicine.

Please tell your doctor or pharmacist if your work involves handling of mercury or its compounds.

- Taking other medicines

Tell your doctor or pharmacist if you are taking any other medicines, including any that you buy without a prescription from a pharmacy, supermarket or health food shop.

How to use Neuromethyn

- How much to take

Take 1 capsule three times per day.

- When to take it

Take 3 times daily or as directed by your doctor or pharmacist.

- How long to take it

Take Neuromethyn for the duration your doctor or pharmacist recommends.

- If you forget to take it

Take the missed dose as soon as you remember. If it is almost time for your next dose, wait until then to take the medicine and skip the missed dose. Do not take a double dose to make up for the missed dose.

- If you take too much (overdose)

Contact your doctor immediately or go to the Emergency Department of your nearest hospital, if you or anyone else may have taken too much of this medicine. Do this even if there are no signs of discomfort or poisoning. You may need urgent medical attention.

While you are taking it

- Things you must do

Take your medicine exactly as your doctor has told you.

Tell all the doctors, dentists and pharmacists treating you that you are taking Neuromethyn.

Tell your doctor immediately if you become pregnant while using this medication.

- Things you must not do

Do not stop taking the medicine unless advised by your doctor.

Do not take any new medicines without consulting your doctor or pharmacist.

Do not give Neuromethyn to anyone else, even if they have the same symptoms or condition as you.

- Things to be careful of

If you did not feel or see any improvement in your condition after many months of taking this medicine, please see your doctor again.

Side effects

Like all medicines, Neuromethyn can cause side effects, although not everybody gets them.

Side effects including eating disorder, nausea or diarrhea may occur infrequently. Rarely, skin rash may occur.

Visit your doctor or pharmacist immediately if you experience any side effects after taking this medicine.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npra.gov.my [Consumers→ Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)]

Storage and Disposal of Neuromethyn

- Storage

Store below 30°C.

Protect from moisture and light.

- Disposal

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.

Product Description
