What Tinea-Kare Anti-Fungal Spray is used for

It is used for the treatment of:

- All dermatomycoses due to dermatophytes (Trichophyton species) e.g. athlete's foot (Tinea pedis), jock itch (Tinea cruris) and ringworm (Tinea corporis)
- All dermatomycoses due to yeast (Candida species) e.g. Candida vulvitis, Candida balanitis
- Dermatomycoses due to moulds and other fungi
- Skin diseases showing secondary infection with these fungi

How Tinea-Kare Anti-Fungal Spray works

It contains clotrimazole which is an antifungal agent which fights the cause of fungal infections.

Before you use Tinea-Kare Anti-Fungal Spray

- When you must not use it

Do not use it if you are allergic to any ingredients of Tinea-Kare Anti-Fungal Spray.

- Before you start to use it

Safety for use in pregnancy and during breastfeeding has not been established. Inform your doctor if you are pregnant or breastfeeding. Please follow the advice of the doctor or pharmacist.

- Taking other medicines

Please inform the doctor or pharmacist if taking other medicines.

How to use Tinea-Kare Anti-Fungal Spray

- How much to use

General: The affected area should be washed, thoroughly dried and sprayed a thin layer of Tinea-Kare Anti-Fungal Spray to the affected area twice daily. Treatment should continue for 2- 4 weeks after the disappearance of all signs of infection to ensure mycological cure and prevent relapse. Adult & Paediatric dosing based on type of infection:

- Candidiasis (topical): twice daily for up to 4 weeks
- Pityriasis versicolor (Tinea versicolor): twice daily for up to 4 weeks
- Tinea corporis: twice daily for up to 4 weeks
- Tinea cruris: twice daily for up to 4 weeks
- Tinea pedis: twice daily for up to 4 weeks

Follow all directions given to you by your doctor and pharmacist carefully. They may differ from the information contained in this leaflet. If you do not understand the instructions on the label, ask your doctor or pharmacist for help.

- When to use it

Please follow the advice of the doctor or pharmacist.

- How long to use it

Please check with your doctor or pharmacist.

- If you forget to use it

If you forget to use, apply it as soon as you remember.

- If you use too much (overdose)

Acute overdosage with topical application of clotrimazole is unlikely and would not be expected to lead to a life-threatening situation.

While you are using Tinea-Kare Anti-Fungal Spray

- Things you must do

Inform your doctor or pharmacist of all the medications you are taking.

- Things you must not do

Do not stop using medication although you feel better after a few days, until the prescribed course is finished.

Do not take any new medicines without consulting your doctor.

Do not give Tinea-Kare Anti-Fungal Spray to anyone else, even if they have the same symptoms or condition as you.

Things to be careful of

Ask your health care provider any question you may have about how to use Tinea-Kare Anti-Fungal Spray.

Side effects

Local reactions include irritation, burning sensation, contact dermatitis, blister, edema, erythema, peeling of skin, pruritus, urticarial and stinging of skin.

You may report any side effects or adverse drug reactions directly to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npra.gov.my [Consumers -> Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)].

Storage and Disposal of Tinea-Kare Anti-Fungal Spray

- Storage

Store below 30°C. Keep out of reach of children.

- Disposal

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
