What Ferrovit capsule is used for

Ferrovit is used for people with anemia or pregnant women with anemic symptoms.

How Ferrovit capsule works

- The ingredients present in Ferrovit capsule are ferrous fumarate, folic acid and vitamin B 12.
- Iron is usually found in foods and is necessary for the normal development of red blood cells. A lack of iron affects the development of the red blood cells and causes a reduction in the number of red blood cells found in the body (iron deficiency anaemia). The prevention of iron deficiency during pregnancy usually requires a combination of iron and folic acid.

Before you use Ferrovit capsule

- When you must not use it

Do not use Ferrovit capsule

- If you are allergic to any of the ingredients of this medicine listed in Product Description

- Before you start to use it

Talk to your doctor or pharmacist before taking Ferrovit capsule if:

- You have any medical illness.

Pregnancy and Lactation

- Ferrovit capsule can be used during pregnancy & breastfeeding

if clinically indicated, ask your doctor or pharmacist for advice before taking this medicine.

- Taking other medicines

- Tell your doctor if you are taking any other medicines, including any that you buy without a prescription from a pharmacy, supermarket or health food shop.

How to use Ferrovit capsule

- How much to use

Follow all directions given to you by your doctor or pharmacist carefully.

Swallow the capsule whole with water. Do not chew.

Adults:

One capsule twice daily or as directed by a physician.

- When to use it

Take 2 times a day after meals or as directed by your doctor or pharmacist.

- How long to use it

Take Ferrovit capsule for the duration as your doctor recommends.

- If you forget to use it

Take the missed dose as soon as you remember it. If it is almost time for your next dose, wait until then to take the medicine and skip the missed dose. Do not take a double dose to make up for a forgotten dose.

- If you use too much (overdose)

If you (or someone else) accidentally take too many capsule, you should tell your doctor or contact the nearest emergency department of your nearest hospital. If you think you or anyone else may have use too much of this medicine. Do this even if there are no signs of discomfort or poisoning. You may need urgent medical attention.

While you are using it

- Things you must do

- Take your medicine exactly as your doctor or pharmacist has told you.

- Things you must not do

- Do not stop taking the medicine unless advised by your doctor.
- Do not take any new medicines without consulting your doctor or pharmacist.
- Do not give Ferrovit Capsule, to anyone else, even if they have the same symptoms or condition as you.

- Things to be careful of

- Do not exceed the recommended dose or duration of treatment.

Side effects

- Like all medicines, Ferrovit capsule can cause side effects, although not everybody gets them.
- Visit your doctor or pharmacist immediately if you experience any side effects after using this medicine. You may report any side effects or adverse drug reactions to the National Centre for Adverse Drug Reaction Monitoring by visiting the website npra.gov.my [Consumers → Reporting Side Effects to Medicines (ConSERF) or Vaccines (AEFI)].

Storage and disposal of Ferrovit capsule

- Storage

- Keep this medicine out of the sight and reach of children.
- Store below 30°C in a dry place, away from direct sunlight
- Do not use this medicine after the expiry date which is stated on the carton after the letters EXP. The expiry date refers to the last day of that month.

- Disposal

Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to throw away medicines you no longer use. These measures will help to protect the environment.
